Like the battery, a failing spark plug can be tested with a multimeter. To test the flow of electricity from the battery to the spark plug, remove it while the plug is still attached the spark plug wire. Turn the engine over and watch for a spark. A red, orange, or yellow spark is also indicative of a poor quality charge.

The spark plug wires attached to the distributor cap cylinder towers deliver the voltage to the spark plug in each cylinder. Current flowing through the ignition coil's primary windings creates a magnetic field. When that current flow is interrupted the collapsing magnetic field produces an electric current in the secondary windings, which is ...
