The problem i having is it seems that the engine seems to be struggling (i think due to all the extra weight and the larger tyres) and fuel economy is shocking. I am pretty new to suzukis so i was thinking to converting to a v6 h25a engine (or something better) or is there something you can do to the J20a engine to give it that more power.

JDM ENGINES DIRECT!

The J20a engine is built very strong and reliable and could quite easily withstand a lot of power increases; however, tripling the horsepower is a whole different story. The J20A, I would say, is an engine with a "neutral" design - that is, its design is not strongly biased in any particular direction.
