Extraterrestrial life is hypothetical life that may occur outside Earth and which did not originate on Earth. Such life might range from simple prokaryotes (or comparable life forms) to intelligent beings and even sapient beings, possibly bringing forth civilizations that might be far more advanced than humanity. The Drake equation speculates about the existence of sapient life elsewhere in ...

Friends, my last post explored how real leadership in an age of turbulence starts with being grounded and skilled at settling our nervous system — since as leaders, we're emotional senders. Other people's nervous systems pick up how we're feeling thanks to mirror neurons (which I've written about here), and so simply through the quality of our presence, we can either amplify fear and ...
