new aluminium composite rain screen cladding. According to the application, the purpose of the cladding was to improve heating and energy efficiency, and external appearance.

Grenfell Tower fire - Wikipedia

Cladding is the outer layer of the fuel rods, standing between the coolant and the nuclear fuel. It is made of a corrosion-resistant material with low absorption cross section for thermal neutrons , usually Zircaloy or steel in modern constructions, or magnesium with small amount of aluminium and other metals for the now-obsolete Magnox reactors .

Nuclear fuel - Wikipedia

Chrome plating was the primary method used in the past, but this is increasingly being superseded by laser cladding, due to the superior durability it offers. Some estimates say that laser cladding can improve durability of these products by 100%. Replacement for Hard Chromium Plating
