Biology is the scientific study of life. It is a natural science with a broad scope but has several unifying themes that tie it together as a single, coherent field. For instance, all organisms are made up of cells that process hereditary information encoded in genes, which can be transmitted to future generations. Another major theme is evolution, which explains the unity and diversity of life.

The early modern period of modern history follows the late Middle Ages of the post-classical era. Although the chronological limits of this period are open to debate, the timeframe spans the period after the late post-classical or Middle Ages (c. 1400-1500) through the beginning of the Age of Revolutions (c. 1800). It is variously demarcated by historians as beginning with the Ottoman ...

From a logical point of view, the rule has been violated whenever someone goes to Boston without taking the subway. Hence the logically correct answer is to turn over the Boston card (to see if this person took the subway) and the cab card (to see if the person taking the cab went to Boston). More generally, for a rule of the form If P then Q, one should turn over the cards that represent the ...

Evolutionary Psychology Primer by Leda Cosmides and John Tooby

The Bacillus . Mtb is a slow growing mycobacteria with a doubling time of 12-24 h under optimal conditions. A major feature of Mtb is the peculiar cell wall structure, that provides an exceptionally strong impermeable barrier to noxious compounds and drugs and that plays a fundamental role in virulence. The classical view of the mycobacterial cell wall structure has been revised thanks to ...

(PH-Campbell 421) The adaptations shown in this figure allegedly developed over millions of years as plants had to acquire new features to be able to survive on land. Superficially, similarities between the algae and plant are shown, but the information required to produce the new structures and their functions cannot be explained within the evolutionary framework.

Conspiracy theories are omnipresent among members of modern and traditional societies (West & Sanders, 2003). A common definition of conspiracy theory is the conviction that a group of actors meets in secret agreement with the purpose of attaining some malevolent goal (e.g., Bale, 2007). Contrary to the view that belief in such theories is pathological (Hofstadter, 1966), large portions of the ...
