Printing is a process for mass reproducing text and images using a master form or template. The earliest non-paper products involving printing include cylinder seals and objects such as the Cyrus Cylinder and the Cylinders of Nabonidus. The earliest known form of printing as applied to paper was woodblock printing, which appeared in China before 220 AD for cloth printing.

Letterpress printing is a technique of relief printing. Using a printing press, the process allows many copies to be produced by repeated direct impression of an inked, raised surface against sheets or a continuous roll of paper. A worker composes and locks movable type into the "bed" or "chase" of a press, inks it, and presses paper against it to transfer the ink from the type, which creates ...

Offset printing — A printing technique wherein plates of your design are created in four colors (CMYK). These plates are then run through a large, industrial printer. Offset printing has high setup costs (i.e. the plates need to be created), but in large volumes (usually over 1,000 or so pieces) it is more economical.
