Wylfa nuclear power station (Welsh: Atomfa'r Wylfa) is a decommissioned Magnox nuclear power station situated west of Cemaes Bay on the island of Anglesey, off the northwestern coast of Wales. Construction of the two 490 MW nuclear reactors, known as "Reactor 1" and "Reactor 2", began in 1963. They became operational in 1971. Wylfa was located on the coast because seawater was used as a coolant.

Solar power is the conversion of renewable energy from sunlight into electricity, either directly using photovoltaics (PV), indirectly using concentrated solar power, or a combination. Concentrated solar power systems use lenses or mirrors and solar tracking systems to focus a large area of sunlight into a small beam. Photovoltaic cells convert light into an electric current using the ...

Electrical engineering is a collaborative field where multiple field experts have to work together to develop innovations. An electrical engineer may work on a project with other engineers, designers, scientists and manufacturers who all have their own ideas about the best way to turn a concept into reality.
