Calorie deficit is the key to lose weight and keeping calorie intake lower and burn more calories would bring about weight loss. There's no particular "food" or "superfood" that would switch on the fat-burning switch, but there are certain foods that actually do accelerate the whole process and "slow carbs" are one of them.

In chemistry, there are three definitions in common use of the word base, known as Arrhenius bases, Brønsted bases, and Lewis bases. All definitions agree that bases are substances which react with acids as originally proposed by G.-F. Rouelle in the mid-18th century.. In 1884, Svante Arrhenius proposed that a base is a substance which dissociates in aqueous solution to form Hydroxide ions OH^- .

Base (chemistry) - Wikipedia
