Arduino UNO Pinout Diagram | Microcontroller Tutorials

Older versions of the Raspberrry Pi can be used for the projects below, but they definitely would not be as fast and reliable as the RPi 4. They make a big difference when you're working on the projects. For example, you can expect a much slower Pi-based computer if you are working with a Pi 3 Model A+ instead of Pi 4.

Top 40 Raspberry Pi 4 Projects That You Must Try in 2022

Starting last year, boards with a black soldermask and an STM32F4 Access (entry-level) series MCUs including the F401 and F411 began to appear. These boards with the nickname 'Black Pill' or ...

Blue Pill Vs Black Pill: Transitioning From STM32F103 To ... - Hackaday

A word of warning about USBPcap. There have been problems with using USBPcap in the past, and while these problems should be resolved now, you may wish to familiarize yourself with these earlier problems, in the event you are still affected by it..
