"Human knowledge is expressed in language. So computational linguistics is very important." –Mark Steedman, ACL Presidential Address (2007) Computational linguistics is the scientific and engineering discipline concerned with understanding written and spoken language from a computational perspective, and building artifacts that usefully process and produce language, either in bulk or in ...

Computational Linguistics (Stanford Encyclopedia of Philosophy)
Specifically, based on the multi-level encoder, we 1) translate discourse relations in low-dimensional embedding space (called TransS), which could mine the latent geometric structure information of argument-relation instances; 2) further exploit the semantic features of arguments to assist discourse understanding; 3) jointly learn 1) and 2) to ...
