A Mathematicians Apology

A Mathematician's Apology is a 1940 essay by British mathematician G. H. Hardy, which offers a defence of the pursuit of mathematics. Central to Hardy's "apology" — in the sense of a formal justification or defence (as in Plato's Apology of Socrates) — is an argument that mathematics has value independent of possible applications.

art-critics, and physiologists, physicists, or mathematicians have usually similar feelings: there is no scorn more profound, or on the whole more justifiable, than that of the men who make for the men who explain. Exposition, criticism, appreciation, is work for second-rate minds. I can remember arguing this point once in one of the few
