CWCT has received enquiries about the need to CE mark curtain wall brackets in accordance with EN 1090 as they can be considered structural products. CWCT's understanding is that curtain walling is excluded from the scope of EN 1090 and this is set out in document WG-6 0488-CPR 07/04/3 - Cases where CE marking is not possible on the basis of EN 1090-1.

CE marking of curtain wall brackets | CWCT

Simmons describes this curtain wall as a hybrid, one that combines characteristics of a window wall where individual panels have no structural dependency on adjacent panels. "The

File Type PDF Ce 479 Curtain Wall Structures Book

fact is, hybrids are becoming much more common because they can achieve certain architectural intentions that could not be achieved by traditional aluminum unitized curtain walls," he explains.

Behind the Curtain Wall - CE Center - CE Center Home

Curtainwall framing is designed to extend out from a building through connection clips and/or welded connections. While curtainwall studs do not typically carry vertical loads from the structure itself, they are considered load-bearing as they must be engineered to carry the load of the exterior finish of a structure combined with whatever wind load specified by the designer or that pertains ...
