I didn't want my doors rubbing against my cabinet faceframes so I attached a strip of 1/4" plywood at the top and bottom rails. There was a joist right above the front edge of these upper cabinets, so I butted a 2x4 up right against the front of the cabinets and drove 3" screws in at an angle in order to secure it to the joist.

An Easy Guide to Building DIY Sliding Doors for Cabinets

So, if you would like your DIY grid-tied solar system to offset 100% of your electricity consumption, you'll need to install solar panels amounting to 6887 watts of power output, or a 6,87 kW solar system. Most first-time DIY installers only want to offset 50 - 75% of their electricity consumption (to lower the startup costs).
