Educational efforts in bioethics are prevalent, but little is known about their efficacy. Although previous work indicates that courses in bioethics have a demonstrable effect on medical students, it has not examined their effect on health care professionals. In this report, we describe a study designed to investigate the effect of bioethics education on health care professionals.

In this chapter, we present semi-structured interviewing as an adaptable method useful in bioethics research to gather data for issues of concern to researchers in the field. We discuss the theory and practice behind developing the interview guide, the logistics of managing a semi-structured interview-based research project, developing and applying a codebook, and data analysis.

Semi-Structured Interviews in Bioethics Research | Emerald ...

The use of empirical research methods in bioethics has been increasing in the last decades. It has resulted in discussions about the 'empirical turn of bioethics' and raised questions related to the value of empirical work for this field, methodological questions about its quality and rigor, and how this integration of the normative and the empirical can be achieved.

The use of empirical research in bioethics: a survey of ...

Questions and topics that don't interest the participant, repeated questions, overly difficult questions, distressing and/or sensitive questions, lack of pleasant social interactions, and research that involves little or no opportunity for introspection or learning seem to contribute to research fatigue.8 8 Clark, op. cit. note 1, pp. 956-957, 962.
