On the left, go to System > User Administration > Users. On the right, edit the nsroot user. At the top of the page, in the System User section, click the pencil icon. Uncheck the box next to Enable External Authentication and then click Continue. Click Save and then click Done. If you logout:

System Configuration - Citrix ADC 13 - Carl Stalhood

Virtual Desktop Infrastructure (VDI) is very complex. Many companies set out to build a Windows-based VDI or DaaS (Desktop-as-a-Service in the cloud) offering for their users but poor planning and execution can lead to hitting brick walls which ultimately lead to projects stalling out or outright failure, as in scrap it completely and do something else after much time and money spent.

The How to Build A Windows Virtual Desktop (VDI) Experience Properly ...
