# Online Library

## Precast

### Construction

#### **Tindall Corporation**

Precast concrete piers are optimally used when constructed adjacent to traffic. This application can be best visualized for a two span bridge with a pier located between median barriers . The use of precast piers minimizes traffic disruptions and construction work near traffic. 7.1.4.1.2

#### Application

#### **Chapter 7**

#### **Accelerated Bridge Construction**

Recently at a precast concrete facility, a 7-tonne precast concrete wall panel fell from a truck-mounted A-frame after being loaded onto the truck by a bridge crane. The panel had been connected to the crane with a 2-legged chain and only 1 chain had been disconnected from the panel.
