Principles of Bacteriology: A Practical Manual for Students and Physicians Antony van Leeuwenhoek, the first to describe the bodies now recognized as bacteria, was born at Delft, in Holland, in 1632. He was not considered a man of liberal education, having been during his early years an apprentice to a linendraper.

The primary mission of the clinical bacteriology laboratory is to assist the health care provider in the diagnosis of infectious diseases. Due to the variety of specimens submitted to the bacteriology laboratory, many of the steps related to the processing and workup of a specimen have remained manual.
