Sae Straight Spline Tolerance Class

According to the ISO standard there are four classes of machining tolerance for splines (4, 5, 6, 7) and six fit classes (H/d, H/e, H/f, H/h, H/js, H/k). Fittings mentioned above concern side fits only. Tooth flanks transmit the torque and simultaneously create the coaxial connection.

Tolerance Analysis of Involute Splines

The tables below show the dimensions of a straight sided spline in accordance with BS 5686:1986, ISO 14-1982: Specification for straight-sided splines for cylindrical shafts: metric nominal dimensions, tolerances and gauging requirements. Straight Sided Spline Dimensions. The profile of a straight sided spline is defined by

In the SAE B92.1 standard, there are 4 tolerance classes: 4,5,6, and 7, which represent increasing levels of accuracy. A spline made to any of these tolerance classes will mate with a spline made to any of the other tolerance classes. The tooth thicknesses and space widths of spline teeth are specified as both actual and effective.

Looking for shaft dimensions and tolerances for a 3.750" 16 Spline SAE Straight Spline, Type B - To Slide Not Under Load. I have the original drawing which specifies "Splines as per formula in SAE Handbook, 1940 edition, page 233, Type-B Fit to match (mating part)" The problem is, I have a 1940 SAE handbook, and the information is the same as the current SAE J499 spec, which has no info on the ...

Straight-Tooth Spline Strength Splines have the same failure mechanisms as keys: 1) shear or 2) bearing. The torque capacity per unit length of an SAE spline is based on a 1,000 psi bearing stress on the sides. Depending on the class of fit, a spline is able to accommodate axial movement along the shaft and still transmit torque.

The internal spline is held to basic dimensions and the external spline is varied to control the fit. Involute splines have maximum strength at the base, can be accurately spaced and are self-centering, thus equalizing the bearing and stresses, and they can be measured and fitted accurately.
