When I was a freshman in high school, I took a semester of art. Our teacher, Ms. Furey, assigned us a project known as "88 Squares." We were to draw a grid of 88 squares on a large piece of paper, choose two opposing colors from the color wheel, and fill in each square with a design using those colors in tints (add white) and shades (add black).

Never in my life did I imagine a book would be a scam, but I found it in Suck It Up, Buttercup, by Robert Cass. The title was compelling, but there is literally no coherent text inside. Practical jokes are one thing, but selling a book for \$19.99, marketing it under business and economics, and providing this gibberish should be criminal.
