Unsolved Math Problems | Hardest Math Problems and Equations

The two ways of categorising types of questions overlap and support each other. For example, the questions: Can you see a pattern? How can this pattern help you find an answer? relate to Interpretation, and; the questions: What have you discovered? How did you find that out? Why do you think that? require Analysis, and; the questions:

Using Questioning to Stimulate Mathematical Thinking

Nature and influence of the problems. Hilbert's problems ranged greatly in topic and precision. Some of them, like the 3rd problem, which was the first to be solved, or the 8th problem (the Riemann hypothesis), which still remains unresolved, were presented precisely enough to enable a clear affirmative or negative answer. For other problems, such as the 5th, experts have traditionally agreed ...
