The ratio of the diagonal to the side of a pentagon is the Divine Proportion. Moreover, the diagonals create an isosceles triangle (where two of the three sides are equal) with angles of 72 degrees and 36 degrees. This triangle can be reproduced inside itself to infinity (in a "self-developing" manner), as shown below.

The Divine Proportion

The divine proportion: a study in mathematical beauty. [H E Huntley] -- Engaging introduction to that curious feature of mathematics which provides framework for so many structures in biology, chemistry, and the arts.
