Considers parenting from the perspectives of mothers, fathers and children themselves, as well as those of black and minority ethnic parents and families living in poverty with restricted access to support services Editor: David Utting August 2007 Parenting and the different ways it can affect children's lives: research evidence www.jrf.org.uk

### Parenting and the different ways it can affect children's lives ...

Urinary tract infections (UTIs) Regarding the use of male newborn circumcision to prevent UTIs in children, the GRADE system found that the evidence is low quality and any strength of recommending circumcision for routine practice is weak (Dave et al. 2017).. The strength of the recommendation for practice is considered to be stronger in situations involving newborns with actual medical problems.

### Evidence and Ethics on: Circumcision - Evidence Based Birth®

Evidenced based research is important as ultimately there has to be some scrutiny of ideas and interventions that have some chance of relevance. True that social science is more messy that physical science, but to paraphrase, evidence based practice is the worst system aside from all the other options available
